

Feedback sulla fase di ricerca

La riunione di Mansle (Francia, dal 10 al 12 maggio 2012) ha sancito la conclusione della prima fase del progetto: la ricerca. L'Università di Southampton, Tandem Fundazioa e il Centro Ellenico di Cultura hanno svolto una ricerca molto estesa sulla diffusione in Europa dei language Café, del metodo Tandem e dei caffè linguistici virtuali, mentre gli altri partner hanno condotto ricerche sul campo sui bisogni di apprendimento linguistico degli immigrati.

Feedback at the meeting clearly identified that there were common results across the partnership:

- Adult language learners suffered from lack of confidence in learning and using a new language
- There was a need to practice the language through conversation rather than or in addition to taking formal language learning classes
- Target groups in every country identified that they wished to learn a language in a non formal environment
- Target groups in every country wanted to learn the language to support both social and cultural integration to improve their quality of life, as well as help some seek and obtain employment.
- All countries identified that parents wanted to learn the language to support their children who were attending school in their host country.
